

Janu Ahirwar

Mechanical Engineering Undergraduate, 2027

januahirwar44@gmail.com | +91-7389804691 | linkedin.com/in/januahirwar | github.com/janu200512

EDUCATION

University Institute of Technology, RGPV, Shivpuri

B.Tech in Mechanical Engineering CGPA: 5.67

Sep. 2024 – Pursuing

Shivpuri, Madhya Pradesh

Government Polytechnic College, Ashok Nagar

Diploma in Mechanical Engineering CGPA: 7.27

Sep. 2021 – May 2024

Ashok Nagar, Madhya Pradesh

EXPERIENCE

Mastercard

Aug 2026 – Sep 2026

Advisors Consulting & Services Virtual Internship (Job Simulation)

Virtual

- Analyzed a comprehensive data set using statistical analysis and comparative study to identify key trends in sales and customer engagement.
- Developed and presented a strategic marketing plan based on data insights, communicating findings to non-technical stakeholders through clear narratives and visualizations.
- Utilized data analytics tools to produce actionable recommendations for improving ROI and marketing practices.

SPM Autocomp System Pvt. Ltd

Feb 2024 – Jul 2024

CNC Programmer Intern

Pithampur, Dhar (M.P.)

- Gained hands-on experience in CNC programming and machine operating.
- Worked on industrial projects involving precision machining.

GAIL (India) Limited

Jan 2024 – Feb 2024

Vocational Training & Internship

Guna (M.P.)

- Trained in CNC programming and manufacturing engineering.
- Learned industrial practices, documentation, and quality standards.

PROJECTS

MediStock-AI | *Python, Streamlit, Pandas, Scikit-learn, Random Forest*

Live / GitHub

- Developed an AI-assisted healthcare inventory dashboard that analyzes historical inventory data and forecasts short-term demand using a Random Forest model.
- Calculated days of stock cover and identified potential stock-out risks to support timely reorders.
- Generated replenishment quantity recommendations with a downloadable reorder plan.
- Built with Python, Streamlit, Pandas, and Scikit-learn; deployed as a live demo.

Miniature Wind Turbine | *HAWT Design, DC Generator, Voltage Regulator, Battery System*

Project Details

- Designed and fabricated a portable Horizontal Axis Wind Turbine (HAWT) for off-grid power generation in low-wind conditions (B.Tech minor project, team project).
- Calculated wind power, Betz limit, tip speed ratio (TSR), RPM, and efficiency.
- Integrated a low-RPM DC generator, voltage regulator, and battery system.
- Tested under varying wind speeds: cut-in speed of approx. 2.5–3 m/s; generated approx. 7–8 V at approx. 955 RPM, sufficient for LED lighting and mobile charging.

CERTIFICATIONS

- Advisors & Consulting Services Job Simulation – Mastercard (Sep 2026)
- Data Analytics Job Simulation – Deloitte Australia (Aug 2025)
- ESG Job Simulation – Tata Group (Aug 2025)
- Cybersecurity Job Simulation – Mastercard (Sep 2025)
- AutoCAD & SolidWorks Training – TechCluster, Indore (ongoing)

TECHNICAL SKILLS

Mechanical Design: SolidWorks, AutoCAD (2D & 3D), GD&T, Machine Design, Technical Drafting

Manufacturing: CNC Programming, VMC Programming, Supply Chain Management, Quality Standards, Process Documentation

Programming & Data: Python (Pandas, Scikit-learn, Streamlit), JavaScript, HTML5, CSS, MS Excel, MS Word

Tools & AI: Git, GitHub, GitHub Copilot, Claude.ai, ChatGPT, Google Gemini
